COURSE DESCRIPTION  
This course is an introduction to law and legal process with a particular focus on contract law, jurisprudence, and the impact of law on society. It will help you to understand how legal systems work, how lawyers and judges think, how social values impact the way the law is interpreted, and how legal rules evolve to cover new situations. The first part of the course surveys the ways judges think about the law, using a variety of topics across the landscape of the law. The second part of the course focuses in depth upon contract law so that you can understand how legal doctrine develops in an area critical to business.
