Financial statements are a primary means for firms to communicate information about their performance and strategy to investors and other groups. In the wake of numerous accounting scandals and the recent financial meltdown (which accounting both helped and hindered), it is more important than ever for managers and investors to understand (i) the financial reporting process, (ii) what financial statements do and do not contain, and (iii) the types of discretion managers have in presenting transactions they have undertaken. This course is designed to help you become a more informed user of accounting numbers by increasing your ability to extract, interpret, and analyze information in financial statements.

We will focus on many of the biggest problem areas of financial reporting: While this is not a course in equity valuation per se, equity valuation is one of the most common uses of financial statement data. Accordingly, we will focus on two of the most important issues in valuation: information related to profitability (or cash flow) and information related to risk. In the former case, we will talk about the properties of alternative performance measures (like accounting net income), and we’ll also talk about empirical evidence on how these measures relate to values and forecasting future financial statement data (like future cash flows). In the latter case, we look at assessing the capital structure, especially hard to measure aspects of a firm’s liabilities or debt. We will also study the use of financial ratios and in models of distress prediction.

The course assumes a solid understanding of basic financial accounting (at the level of Acct 611 or A613). A course in finance (discounted cash flow models, weighted average cost of capital, option pricing models), will also be helpful, but not required.

**Course Materials**

Virtually all of the material will be available in the eRoom for Acct 742 on Canvas.

**Text:** Revsine, Collins, Johnson, Mittelstaedt, Soffer - *Financial Reporting and Analysis*, 7th ed., McGraw Hill, 2018. This text serves as a reference on accounting and disclosure topics. Note that the course is not a textbook-based course. The text readings provide supplementary information and information useful for preparing the problems and cases.
FASB Accounting Standards Codification (ASC)

You will also have access to the Financial Accounting Standards Board’s (FASB’s) searchable accounting standards codification (ASC). The ASC is a great reference for technical accounting, although it is not necessarily the user-friendly. (It becomes friendlier with use.) To access the FASB site go to

http://www2.aaahq.org/ascLogin.cfm

The user name is AAAXXXX and the password is XXXXXXX. (to be supplied once the course starts)

Canvas

The course has a site on Canvas. The ASSIGNMENTS folder provides links to the notes, readings, cases, etc for each class session. Within the FILES folder is all the Course Material. There is a sub-folder for each class session, as well as one for the syllabus and the exams. Inside the folder for a given class session, you will see three or four subfolders:

Notes and Readings: This includes notes, problems, cases, and readings that were included in the bulk pack.

Pre Class Material: New readings, problems, and cases (ones not included in the course pack) are contained here. This folder will also have any spreadsheets available to help work the problems and cases. Finally, this folder will contain power point slides that will be constitute the outline of what we’ll cover in class that day. Many students find that printing out the slides before class helps them follow along better. Two to three slides per page is a good compromise between not using up too much paper and having room to jot down notes.

Solutions and Post Class Material: This is where I’ll post solutions, corrections, etc

Office Hours

Feel free to call with questions or contact me via email at the address above. E-mail is often an easier and quicker way to get your questions answered. Office Hours are by appointment.
Grading and Course Requirements

Your grade for the course will be determined on the basis of:

Class Participation            15 %
Quizzes (3)     60 %
Group Project            25 %

Total               100 %

Class Participation

The amount of learning that takes place in the course will depend on how active the class discussions are, which is dependent on the amount of preparation you do before class. Class participation will be based on your contribution to the class discussions and analyses, not simply on the amount of time you talk. If necessary, I will cold call students.

Please bring to each class a Name Card, with your name printed in LARGE LETTERS. This will facilitate my getting to know your names and my ability to reward you for class participation.

Do not do things in class that are disruptive to your fellow students. Examples include:
- Entering or leaving the classroom, except in an emergency.
- Eating and drinking (if it’s noisy)

I allow students to use electronic devices during class. However, do not distract other students with what you’re doing. I reserve the right to rescind this privilege.

QUizzes

There will be 3 open-book, open-notes, in-class Quizzes during the semester. The quizzes are officially “cumulative.” That is, all topics covered prior to that Quiz are fair game to be on the Quiz. However, the material on each Quiz will be heavily weighted to the material covered since the prior Quiz.

More details on the Quizzes will be provided as we get closer.

Questions and solutions from prior exams (which were longer midterm and finals, not shorter quizzes like these) will be available on Canvas. Please be aware that the sequence of topics is not always the same from semester to semester. Therefore, it is possible that there are topics we are covering on, say, Quiz #2 this year that were on midterms in some prior years, finals on other prior years, or may not have been on either one.
**Group Project:**

The project will require your group to complete a thorough analysis of the financial statements of a company selected by you (and pre-approved by me). The company (and year(s)) examined have to have at least one interesting / contentious accounting issue that has significant consequences for the “look and feel” of the financial statements. For example, this issue can be about a business product or business practice that is new and innovative for which the accounting is unclear. Alternatively, this can be an issue about the company’s financial statements that the business press, analysts, and/or short-sellers have discussed and possibly criticized. It can be something that has been litigated or is in the process or being litigated. Or it can be on a topic your group simply feels is interesting and important.

The financial statements you focus on cannot be more than 10 years old. It’s fine if the firm is a non-US firm.

Your group must identify a firm that has been the subject of an accounting controversy (alleged or real). Your report will describe the controversy, describe the relevant accounting rules, what the company actually did, and whether the company’s accounting violates GAAP (either the letter of the law or the spirit).

Groups can be composed of up to 4 students (no exceptions). Groups may contain a mixture of students from my different sections. Group composition and topic approval must be finalized by November 1. I strongly encourage you to form your teams sooner than this and to get started on your project before this date as well. The earlier you decide on a company, the more time you’ll have to work on it, and the better your project is likely to be.

Group Projects must be turned in by 12 noon on Tuesday December 18. Ideally, someone in your group will turn in a hard copy to the accounting suite by the deadline. In addition, an electronic copy should also be sent to me via email (by that same time). Don’t use Canvas to send this – it tends to be delayed.

Details regarding the Accounting Analysis Project are provided in the Group Project assignment on Canvas.

**Re-Grading Requests**

All re-grading requests must be made within two calendar weeks following the return of the assignment or exam (unless otherwise noted). A request for a regrade will not be considered if it is submitted more than two weeks after the return of the assignment or exam (or after the specified deadline). To have an assignment or exam re-graded, you must submit the original (with no modifications) and a written description of your disagreement with the initial grade. Do not just come up to me in class or at my office with your exam and verbally explain what you want regraded.
