Max Bai (maxbai@wharton.upenn.edu)  

Classroom & Time  

FNCE 341: M/W 9:00 a.m. – 10:20 a.m., JMHH F55  
FNCE 841: M/W 10:30 a.m. – 11:50 a.m., JMHH F55  

Course Description  

This course is designed to provide students with an understanding of the issues regarding corporate restructuring and the financial management of distressed situations. In any situation of financial distress, there are two imperatives requiring attention if parties aspire to restructure rather than liquidate: (1) dealing with the restructuring of the various claims on the organization and resolving who will receive what new claim in replacement of existing claims, and (2) ensuring the newly restructured entity is able to successfully manage for value creation and be a viable firm post-restructuring. The interaction of these two imperatives, and how alternative restructuring proposals impact the viability of the newly restructured firm, is key to a successful distressed restructuring. By the end of the course participants should  

- be familiar with the legal environment which frames distressed restructurings in the USA  
- be familiar with the various parties, and their roles and interests, in a typical restructuring  
- have insights into the different legal and negotiating alternatives for resolving differences in interests across parties to facilitate deal conclusion  
- be familiar with the tools and methods for anticipating the financial distress of an organization and understand why the firm is in financial distress  
- be capable of assessing the impact of the legal/financial restructuring on the viability of the firm,  
- be able to assess the extent to which alternative restructuring proposals will succeed or fail to enable correction of the management errors which led to the distress in the first place
• be comfortable forecasting cash sources and uses to assess debt repayment capacity, and understand, from an investing point of view, how to identify the fulcrum security and be able to assess the recovery potential of the different levels of the capital structure
• understand how to assess both the sources and magnitude of the value creation (or destruction) potential of a restructuring event as well as the various transfers of value across parties to the restructuring.

On the legal dimension, this course will explore the highly active and sophisticated deal-making environment that is the hallmark of modern distressed corporate restructuring—both under the supervision of a federal court applying chapter 11 of the United States Bankruptcy Code or through an agreement reached by a company and its creditors in out-of-court negotiations. On the finance and business dimension, this course will consider the determinants of financial distress, the methods for anticipating financial distress, how different negotiated outcomes impact both value to be created and value to be transferred across parties, and the role of alternative restructurings for enhancing the ability of the newly restructured company to thrive post restructuring.

The course will comprise three phases: lectures, case discussions, and student-driven learning (interactive and/or research projects and personal reflection).

1. The first phase of the course will be lecture classes. These will focus on establishing the legal framework, including the fundamental rights and obligations of debtors, creditors, and other parties in interest in the various types of major chapter 11 cases, and the conceptual framework for assessing a firm’s financial viability and the causes of financial distress and the value impact of alternative restructurings. This foundation will provide critical insight into understanding the motivations, strategies, and available tools for chapter 11 participants.

2. The second phase of the course will feature a series of case exercises, and classroom discussions and reflection. The case exercises are intended to provide participants an opportunity to work in teams and discuss, analyze, and propose their recommendations for resolving the case situation. Each group must submit a short (maximum one full page) executive summary of their reflections and commentary for each case. These are required for credit but will not be graded. In addition, each group must submit four “long” reports, maximum 3 pages plus exhibits, for four selected case assignments. Each group is expected to hand in a hard-copy of their reports prior to any class discussion. Supporting computations and tables can be included in an appendix and submitted in Excel format. All of the inputs and formulas used should be provided (preferably as a footnote). Some of the case assignments contain questions that need to be addressed, however you will also be graded based upon how well you identify the relevant questions and issues to be addressed. Therefore, whether there are questions for the case or not, please consider what the relevant questions are in the context of each case and discuss why and then perform the necessary analysis to address these questions. There may be opportunities to have guest speakers who will offer the personal perspectives of key players in the restructuring arena—e.g., corporate managers, investors, bankers, and/or financial advisers.

---

1 To accommodate the schedules of our guest speakers, scheduled classes, possibly including the due dates of group reports for the case studies, are subject to change.
3. The third phase of the course will involve student-driven learning including a negotiation case simulation, in which students will be assigned participant roles and challenged to apply the lessons to navigate their way through a distressed negotiation exercise. There will also be a group-based research project - participants will be expected to research a particular case/topic/event related to corporate restructuring and submit a 10-page report and prepare a presentation to the class on the topic/event. Finally, each participant (individually) must submit a personal “reflection” on their key learnings from the course.

Grades will be based upon individual and team performance assessed as follows:

1. PARTICIPATION: Individual (20% of final grade)
2. WATERFALL EXERCISE: Individual (15% of final grade)
3. TER NEGOTIATION EXERCISE: Group (20% of final grade)
4. CASE EXERCISES: Group; Long reports for 2 of the remaining 4 case exercises, short reports for remaining cases by all teams (20% of final grade)
5. TOPICAL GROUP RESEARCH PAPER: Group; A research paper on a self-selected topical issue/event related to distressed restructuring to be presented to the class (20% of final grade)
6. INDIVIDUAL REFLECTION PAPER (5% of final grade) Learning is an effortful process and I have added this assignment in place of a final exam. The purpose of this exercise is to ensure that each individual devotes some time (a couple hours or more) to reflecting back on this course and trying to recall and deepen your understanding of the many topics and concepts covered. You are expected to submit (along with the group paper) your individual reflections on what you learned during this course and the insights you gained. It is expected to be between 2-5 pages and address the following elements: (1) Summarize and demonstrate understanding of the concepts taught in this course, (2) Summarize the insights you gained, and (3) Describe how these insights will impact you/your behavior going forward. Please do not be evaluative (e.g., please avoid statements such as "I really loved the session when we talked about..." or "I found the discussion around xxx to be very confusing...") Simply emphasize your learning by structuring your reflections as, "What I learned was ...." Grading will be based on the depth and quality of your reflections as reflected in the depth and quality of the learning and insights you share in this report.

Note: all written work must be submitted via Canvas in PDF format (or Excel spreadsheet, where appropriate, for example the TER negotiation exercise) and the filename must indicate the individual’s name or team number (for group assignments include both team number and names of team members) and title of the assignment. For the Case Exercises, please ensure your submission also indicates (in the filename of the pdf document) whether it is the “long” report or the “short” report in addition to the name of the case.
